MEMORANDUM FOR THE RECORD

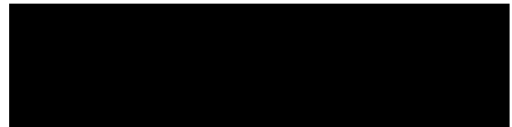

SUBJECT: Geo Space High Resolution Plotter

25X1A5a1

25X1A9a

 regarding a high resolution plotter. It also accepted a plot tape for a trial on the existing Model DP-203.  of ORD/Analysis evaluated both proposals and concluded that the memory required would be excessive at 2 mils resolution and that industry could better fund further development. A copy of his evaluation is attached. The trial plot results at 10 mils proved ragged and generally unacceptable for cartographic purposes. It is recommended that we do not purchase a CRT plotter at this time and await further developments in the field.
